

# Key players in drone jammers – a disruptive innovation in the aerospace and defense industry

- Bubble size = patent volumes between 2020 and 2022

- Application diversity and geographic reach scores are normalized and ranked on a scale between 0 and 1

Source: Drones: The Leading Companies in Drone Jammers Revealed, GlobalData Patent Analytics. Published source: Airport Technology, Data Insights, February 8, 2024

Note: Company name labels for each bubble slightly moved or otherwise made visible for clarity by D-Fend Solutions.

**“In terms of application diversity, BAE Systems, D-Fend Solutions, and Northrop Grumman are some of the leading innovators.”**

“...systems, devices, and methods designed to counter or neutralize target aerial vehicles (drones) by impeding their operation or capturing them. These technologies utilize various techniques ... to disrupt or disable drones and prevent them from posing a threat.”
